

Microsoft
GOLD CERTIFIED

Partner

Symbioun is now Microsoft Gold Certified Partner. This certification is an attestation of the commitment Symbioun has demonstrated towards leveraging Microsoft tools and technologies for its customers. The certification was awarded to Symbioun on the basis of its ability to build and deliver software products on the Microsoft platform in addition to internal training and certification of Symbiounites. “The Gold Certification is just the beginning. Our goal for the next 24-months is to become the preferred Microsoft Partner for ISVs in implementing .NET based product development efforts”, says Shanker Janakiraman, CTO of Symbioun.
